Brand New Book ***** Print on Demand *****.Excerpt from Domestic Science: Crete Plan The rapid and substantial growth of industrial education during the past few years can be explained only on the hypothesis that it is meeting the demands of the best educators. To find a place in our educational system a new subject must add something to the physical, mental or moral development of the pupil. Industrial education has proved that it adds to the powers of the pupil in all three of these essentials. Manual training and domestic science have made the most rapid growth, partly because it is easier to prepare for the successful teaching of these subjects and partly because skill acquired in them is more readily and quickly applied in actual life. Schools in the cities and larger towns are able to equip rooms for manual training and domestic science and employ special teachers for these subjects. The smaller towns and rural schools, however, where such work is needed as much as in the cities, cannot meet the extra expense of equipment and teachers. Whatever will in any way...
