Linearization of Chains and Sideward Movement

By Jairo Nunes

MIT Press Ltd, United States, 2004. Paperback. Book Condition: New. New.. 228 x 151 mm. Language: English . Brand New Book. This highly original monograph treats movement operations within the Minimalist Program. Jairo Nunes argues that traces are not grammatical primitives and that their properties follow from deeper features of the system, and, in particular, that the phonetic realization of traces is determined by linearization computations coupled with economy conditions regarding deletion. He proposes a version of the copy theory of movement according to which movement must be construed as a description of the interaction of the independent operations Copy, Merge, Form Chain, and Chain Reduction. Empirical evidence to support this claim includes instances of sideward movement between subtrees in a derivation. According to this analysis, the linearization of chains in the phonological component constrains sideward movement so that it is possible to account for standard properties of multiple gap constructions, including parasitic gap and ATB constructions, without construction-specific operations or principles that are not independently motivated. Theoretical linguists will find *Linearization of Chains and Sideward Movement* of great interest both theoretically and empirically. The version of the copy theory of movement proposed by Nunes will stir debate and shape future...
