The difference of-position would correspond to a shifting of the line, p a, around S, the end, a, moving upwards, through an angle of 2 11 . The latter difference is one which could be wholly accounted for, not Only by assuming a very minute error in the determination of the radiant-point of the November shooting-stars, but by assuming very slight errors in the observations made upon comet I., 1866, during the time that it continued visible in our skies. No reasonable doubt can exist that the meteors and the comet form a single system. And, by the way, it is worth noticing, that as the comet passed its perihelion early in January, 1866, it had travelled the best part of the way towards the point, 1, in November, 1866; so that we passed through a point (23) removed some four hundred millions of miles from the nucleus of the comet. In 1865, on the contrary, the earth passed through a point much nearer to the head of the comet, but in advance of it. And now let us consider for a moment the actual volume of the space which is occupied by cosmical bodies, aggregated with greater or less density, and forming what we now know as the November meteor-system. In the first place, we must, I think, dismiss the notion that there are gaps or breaks in the system. A consideration of all the...
