

## Reading the new concept of high school physics - (Volume II)

By ZHAO KAI HUA

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 229 Publisher: People's Education Press Pub. Date :2008-3-1. The main contents of the book. the first chapter electrostatic field. the second chapter a constant current. constant magnetic field. the third chapter. Chapter electromagnetic induction. the fifth AC chapter. Chapter VI electromagnetic fields and electromagnetic waves. special relativity. etc. Chapter VII. Contents: Chapter electrostatic field 1. Law of conservation of charge and electrostatic induction 1.1 1.2 1.3 two kinds of charge-charge conservation law 2. Coulomb's law of universal gravitation with static electricity 2.1 2.2 2.3 Coulomb's law 3. Electric field electric field strength 3.1 3.2 3.3 electric field strength vector point charge field strength 3.4 the electric field strength superposition principle 3.5 field line 4. electric potential electric potential difference 4.1 electric force acting with the electric potential energy 4.2 electric potential and electric potential difference 4.3 point charge field of the electric potential electric potential superimposed 4.4 potential difference and electric field strength of the relationship between the 4.5 equipotential surface 5 charged particle motion in electric field experiments 5.2 5.1 Millikan charged particles in an electric field...

### Reviews

*This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Brennan Koelpin**

*Comprehensive guide! Its this type of very good read through. It is actually writter in simple words and phrases rather than difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Bernie Mante PhD**
