The Role of the Solvent in Chemical Reactions

By Erwin Bunel, Robert A. Stairs, Harold Wilson

Oxford University Press, United Kingdom, 2003. Paperback. Book Condition: New. Original.. 242 x 188 mm. Language: English Brand New Book ***** Print on Demand *****.The Oxford Chemistry Masters series is designed to provide clear and concise accounts of important topics - both established and emergent - that may be encountered by chemistry students as they progress from the senior undergraduate stage through postgraduate study to leadership in research. These Masters assume little prior knowledge, other than the foundations provided by an undergraduate degree in chemistry, and lead the reader through to an appreciation of the state of the art in the topic whilst providing an entree to the original literature in the field. The role of the solvent in chemical reactions is one of immediate and daily concern to the practising chemist. Whether in the laboratory, or in industry, most reactions are carried out in the liquid phase. In the majority of these, one or two reacting components, or reagents, are dissolved in a suitable medium and the reaction is allowed to take place. Given the importance of solvent, the need for an in-depth understanding of this topic is obvious. However, many inorganic and organic chemistry texts only make passing...
